

The background image shows a workshop environment where several people are working on electronic projects. In the foreground, a man with a beard is looking at a laptop. Behind him, another man is smiling and looking at a laptop. To the right, a woman is also working on a laptop. The laptops have various stickers on them, including one that says 'FAB25'. The overall atmosphere is collaborative and focused on technology.

Internet of Things (IoT)

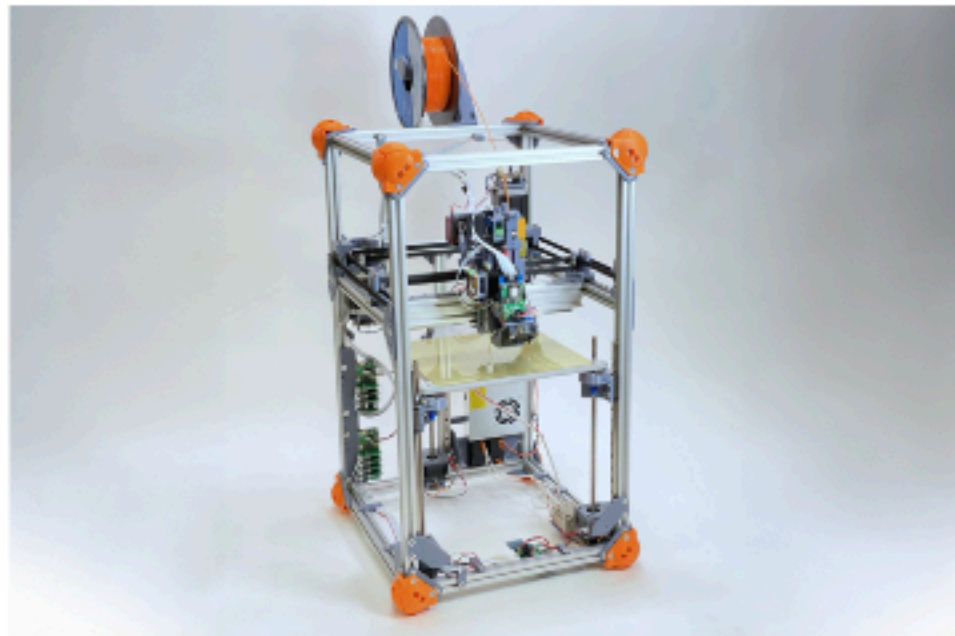

La Internet de les Coses (IoT) es refereix a una xarxa de dispositius físics, vehicles, electrodomèstics i altres objectes físics que estan incrustats amb sensors, programari i connectivitat de xarxa, permetent-los recollir i compartir dades.

This 3D printer can figure out how to print with an unknown material

The advance could help make 3D printing more sustainable, enabling printing with renewable or recyclable materials that are difficult to characterize.
