OpenAI and Oracle to deploy 64,000 GB200 GPUs at Stargate Abilene data center by 2026 — report

INFORMACIÓN GENERAL   LUEGO DEL ANUNCIO DE MILEI

Advierten sobre «el catastrófico impacto ambiental de los centros de datos» que el Gobierno instalará en la Patagonia

La empresa creadora del Chat GPT anunció la construcción en la Argentina de un data center dedicado a la inteligencia artificial con una inversión estimada en 25 mil millones de dólares. Un informe demuestra cómo las Big Tech pueden empeorar, aún más, la crisis climática mundial.

DESÓRDENES PÚBLICOS

Juzgan a un acusado por falsa amenaza de bomba en un avión que obligó a desplegar un caza
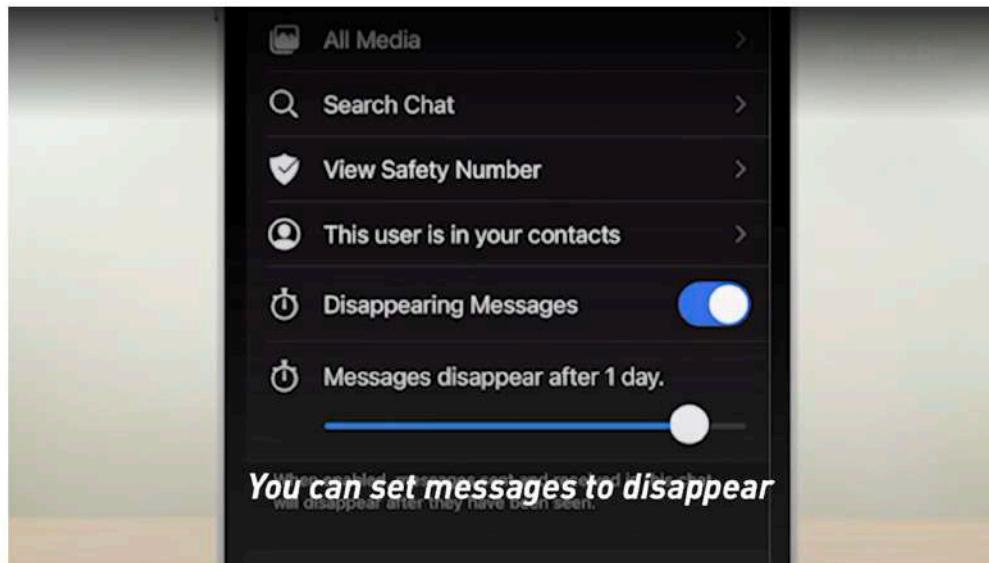

La Audiencia Nacional juzgará este lunes al presunto autor de un delito de desórdenes públicos por enviar a través de la aplicación Snapchat desde el aeropuerto londinense de Gatwick, desde donde viajó a Menorca, el mensaje "de camino a volar el avión (soy miembro de los talibanes)", que resultó falsa amenaza de bomba.

In another turn of events, Mark Zuckerberg also respects his own privacy, by using a chat app that has end-to-end encryption and isn't owned by @facebook

This is the number associated with his account from the recent facebook leak.

Introducing ChatGPT Health

A dedicated experience in ChatGPT designed for health and wellness.

Join the waitlist ↗

Every day, millions of people ask ChatGPT for support with their health

https://openai.com/index/introducing-chatgpt-health/

We're introducing ChatGPT Health, a dedicated experience that securely brings your health information and ChatGPT's intelligence together, to help you feel more informed, prepared, and confident navigating your health.

Health is already one of the most common ways people use ChatGPT, with hundreds of millions of people asking health and wellness questions each week. ChatGPT Health builds on the strong privacy, security, and data controls across ChatGPT with additional, layered protections designed specifically for health—including purpose-built encryption and isolation to keep health conversations protected and compartmentalized. You can securely connect medical records and wellness apps to ground conversations in your own health information, so responses are more relevant and useful to you. Designed in close collaboration with physicians, ChatGPT Health helps people take a more active role in understanding and managing their health and wellness—while supporting, not replacing, care from clinicians.

Nintendo Switch

Nintendo ↗   📶 Wi-Fi ✳ Bluetooth

Review date: Nov. 1, 2023 | Mozilla researched 8 hours ⓘ | Mozilla says 👎 | People voted: A little creepy 😟

What would the world be like without Mario, Zelda, and Animal Crossing? Worse, for sure. Whether you play Mario Kart on the Nintendo Switch or on the cheaper Switch Lite, you're still going to have a good time. And we've always liked that Nintendo puts a lot of emphasis on easy-to-use parental controls. Which is why we were bummed to see that Nintendo made some changes to their privacy policy in recent years that earned them our *Privacy Not Included warning label. And we're sad to say, they still raise enough

Review date: Nov. 1, 2023 | Mozilla researched 8 hours ⓘ | Mozilla says 👎 | People voted: Somewhat creepy 😐

Remember when you actually read books? Back before the days of Twitter and Netflix and your 17-second attention span. The Kindle -- Amazon now offers the Kindle, Kindle Paperwhite, Kindle Oasis, Kindle Scribe, and Kindle Kids -- could be just the thing to get your brain back into book-reading shape. Because that's really all the Kindle does--books. No videos or apps or web surfing. Just books. What a novel idea!

(Dating Apps) (Valentine's Day)

Tinder

Match Group [↗]

📶 Wi-Fi

Review date: March 15, 2024 | Mozilla researched 8 hours ⓘ | Mozilla says 👎 | People voted: Super creepy 😲

Tinder is the app that made swiping right for love--or a hookup--popular. Since its launch in 2012, the world's most popular free dating app wants you to know that it's changed. They recently added quizzes and profile prompts so that users can swipe (and match) on more than just photos. It's a "rizz-first redesign," they said! And their subscription tiers now include a pricey "Tinder Select" option where, for $499/month, you can send messages to people you haven't swiped right on you and be seen by Tinder's most "sought after

Fitbit Inspire 3

Google ↗   ⏸ Bluetooth

Review date: Nov. 1, 2023 | Mozilla researched 8 hours ⓘ | Mozilla says 👎 | People voted: Very creepy 😲

If you want a little tracking--activity, heart rate, sleep--without the extra bells and whistles, this little bracelet could be for you. Just think, in the year 1820, the word tracker meant someone who was good at finding and following animals (or people). Now, in the 21st century, tracker means technology we strap to ourselves to tell us how active we've been and if we've got an irregular heart rhythm. Bet they never saw that coming back in 1820. Another thing they never saw coming? Google. Who, by the way, is the new keeper

(Reproductive Health) (Period & Ovulation Trackers)

Period Tracker

GP International LLC ↗   🛜 Wi-Fi

Review date: Aug. 9, 2022 | Mozilla researched 8 hours ⓘ | Mozilla says 👎 | People voted: Very creepy 😲

The apt, if rather boring, named period tracking app Period Tracker claims to be "the easiest way to track your periods!" We don't know about that. We do know they app lets you track your period, know your fertility window, let's you track things like mood, symptoms, and intimacy. And the app comes with a disclaimer in the app store that says, "Disclaimer: Period Tracker period and fertility forecasts may not be accurate and should not be used to prevent unwanted pregnancy." So there's that.

☐ **Template repository**

Template repositories let users generate new repositories with the same directory structure and files. Learn more about template repositories.

☐ **Require contributors to sign off on web-based commits**

Enabling this setting will require contributors to sign off on commits made through GitHub's web interface. Signing off is a way for contributors to affirm that their commit complies with the repository's terms, commonly the Developer Certificate of Origin (DCO). Learn more about signing off on commits.

Default branch

The default branch is considered the "base" branch in your repository, against which all pull requests and code commits are automatically made, unless you specify a different branch.

| main | | ✎ |

Releases

☐ **Enable release immutability**

Disallow assets and tags from being modified once a release is published.

Social preview

Conceptos básicos de HTML

← Anterior   Overview: Primeros pasos en la Web   Siguiente →

El Lenguaje de Marcado de Hipertexto (HTML) es el código que se utiliza para estructurar y desplegar una página web y sus contenidos. Por ejemplo, sus contenidos podrían ser párrafos, una lista con viñetas, o imágenes y tablas de datos. Como lo sugiere el título, este artículo te dará una comprensión básica de HTML y cúal es su función.

Entonces, ¿qué es HTML en realidad?

HTML no es un lenguaje de programación; es un *lenguaje de marcado* que define la estructura de tu contenido. HTML consiste en una serie de elementos que usarás para encerrar diferentes partes del contenido para que se vean o comporten de una determinada manera. Las etiquetas de encierre pueden hacer de una palabra o una imagen un hipervínculo a otro sitio, se pueden cambiar palabras a cursiva, agrandar o achicar la letra, etc. Por ejemplo, toma la siguiente línea de contenido:

```
HTML                                                    Copy

Mi gato es muy gruñon
```
