We're introducing ChatGPT Health, a dedicated experience that securely brings your health information and ChatGPT's intelligence together, to help you feel more informed, prepared, and confident navigating your health.

Health is already one of the most common ways people use ChatGPT, with hundreds of millions of people asking health and wellness questions each week. ChatGPT Health builds on the strong privacy, security, and data controls across ChatGPT with additional, layered protections designed specifically for health— including purpose-built encryption and isolation to keep health conversations protected and compartmentalized. You can securely connect medical records and wellness apps to ground conversations in your own health information, so responses are more relevant and useful to you. Designed in close collaboration with physicians, ChatGPT Health helps people take a more active role in understanding and managing their health and wellness—while supporting, not replacing, care from clinicians.
